DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 34, 36, 38, and 40. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requires of this title.

3. **Claims 1-2 and 5-9 are rejected under 35 USC 101 because the claimed invention is directed to non-statutory subject matter.**

The claims are directed to a process that does nothing more than manipulate an abstract idea. Mere recitation in the preamble (i.e., intended use) or mere implication of employing a machine or article of manufacture to perform some or all of the recited steps does not confer statutory subject matter to an otherwise abstract idea. There is no practical application in the technological arts. For subject matter to be statutory, the claimed process must be limited to a practical application of the abstract idea or mathematical algorithm in the technological arts. See *In re Alappat* 33 F.3d at 1543, 31 USPQ2d at 1556-57 (quoting *Diamond V. Diehr*, 450 U.S. at 192, 209 USPQ at 10). A claim is limited to a practical application when the method, as claimed, produces a concrete, tangible and useful result: i.e. the method recites a step or act of producing something that is concrete, tangible and useful. See *AT&T v. Excel Communications Inc.*, 172 F.3d at 1358, 50 USPQ2d at 1452.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-11 are rejected under 35 USC 103(a) as being unpatentable over Robertson (patent number 6,609,106), in view of DM News (PTO-892, Item: U).

Robertson teaches a system, means, and method for providing an electronic multi-merchant gift registry service over a distributed network. Robertson teaches a registrant making preference selections for a "wish list" remotely being stored in a database, users making database queries, associating with an online flower merchant, and filling orders placed by remote users (see at least abstract; Fig. 1 (40, 50, 60, 70); col. 1, line 10 through col. 3, line 64).

Robertson teaches all the above as noted under the 103(a) rejection and further teach registrants wishing to delay purchases to some future time or event (see at least col. 2, lines 58-60), but does not specifically disclose fulfilling orders over a period of time or predetermined time period. DM News teaches marthasflowers.com providing a fresh floral delivery service and further teaches a delivery program where flowers can be ordered once or a part of a monthly subscription series with 3-, 6-, and 12-month programs available, akin to Harry and David's original fruit-of-the-month club, the standard bearer for mail-order monthly subscription programs for perishables (Item: U, page 1). Therefore it would have been obvious to one of ordinary skill in the art at time of invention to modify the system, means, and method of Robertson to include interval-based delivery of perishable goods as taught by DM News, in order to maximize

customer usage and enjoyment at peak product freshness, and thereby attract registrants to the commerce service.
